DETAILED ACTION

1. Claims 1-16 are canceled. Claims 17-31 have been added and are under consideration.
2. Sections of Title 35, U.S.Code not found in this action can be found in a prior action.
3. Claims 25 and 26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear how claim 25 and claim 26 further limits the scope of claim 20. Claim 25 recites "expression of membrane-borne protein complexes is induced in the tumor cell suspension prior to killing of said tumor cells". Claim 26 recite "expression of membrane-borne proteins complexes is induced by interferon-gamma and tocopherol acetate". Claim 20 requires that the suspension of tumor cells be incubated with interferon-gamma and tocopherol acetate which would inherently induce membrane-borne protein complexes prior to the killing of the tumor cells. Thus the limitations of claims 25 and 26 are inherent in claim 20.

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claim 31 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.. The claim is drawn to a method of using the composition according to claim 17 for tumor vaccination comprising administering the composition to a patient. The art recognizes that a "vaccine" is required to induce prophylactic immunity (Stedman's Medical Dictionary, 27th Edition, 2000, Definition of the term "vaccine", lines 2-8. When given the broadest reasonable interpretation, claim 17 is drawn to a method of preventing occurrence of a tumor in an individual not previously diagnosed with a tumor. The

Art Unit: 1642

specification does not provide teachings or guidance for how to select a particular tumor material for making the composition of claim 17 such that prophylactic immunity to a tumor will be induced in said individual. The specification does not teach a length of time that said individual would be protected from developing a tumor. The specification does not teach the optimum time for the individual to be vaccinated before the tumor occurs. Given the lack of teachings in the specification regarding the above, one of skill in the art would be subject to undue experimentation in order to use the composition of claim 17 as a vaccine. Amendment of the claim to recite "tumor therapy" rather than "tumor vaccine" would overcome this rejection.

6. All other rejections and objections as set forth in the previous Office action are withdrawn in light of applicant's amendments and arguments.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
